

Data Driven MEP Design, the Leading Digital Engineering Online Event hosted by MagiCAD Group returns on February 1-10, 2022

PUBLISHED JAN 18, 2022
BY [PRESSAT](#)

Join us in this year's event, where we will share our vision for digital engineering in the construction industry utilising data, machine learning and other web technologies.

After a successful premiere in 2020 where thousands of digital engineering experts tuned in to hear from thought leaders in Building Information Modelling (BIM), the Data Driven MEP Design Digital Event returns with new inspiring presentations, problem-solving demonstrations, and lively conversations.

In this year's event, you will find out about new concepts and solutions for staying ahead of the game in Mechanical, Electrical and Plumbing (MEP) design and learn how detailed design solves MEP designers' everyday challenges.

"Today, we are experiencing the digital transformation more than ever before in every aspect of our lives," says Jukka Nyman, Managing Director of MagiCAD Group. "Within the construction industry, there is a strong sense that we are going through a significant leap towards digitalisation. MagiCAD Group has been at the core of this digitalisation for more than two decades, so we are thrilled to be part of a significant breakthrough."

The speaker line-up at the event includes Pauli Keinonen, Director for Innovation, Research and Development at MagiCAD Group, Mikael Ekenberg, Head of Products, MagiCAD Group, and Marzia Bolpagni, Head of BIM International at Mace, among many others.

Find the full schedule at www.magicad.com. Attendance to the event is free of charge and registrations are open.
