Three times faster than the original iVue model, it offers improved efficiency and enhanced image quality.

Harlow, UK – 22nd December 2020 - Haag-Streit UK (HS-UK), the leading manufacturer and distributor of gold-standard optometry and ophthalmic equipment, is pleased to announce the launch of the new iVue80 OCT in the UK.

The new iVue80 SD-OCT system offers 80,000 A-scans per second. Three times faster than the original iVue model, it offers improved efficiency and enhanced image quality. The system also features new scan options and functions, along with a wider field-of-view.

The iVue80 is the next phase in advanced OCT product design, offering retina, glaucoma and anterior segment scanning, as standard. The system quantifies the thickness of the retina, nerve fibre layer, ganglion cell complex and the cornea. It also tracks change and predicts trends in RNFL and GCC thickness and precisely measures angles to aid in disease diagnosis.

Easy-to-use, the iVue80 is suitable for every clinical practice, featuring a streamlined interface and familiar slit lamp-style design. Real-time en face imaging displays a 12mm x 9mm view of the retina during acquisition, to assist the operator in scanning the desired location.

The optional addition of the iCam12, allows the user to upgrade to the iFusion80, combining the advanced capabilities of iVue80 with the high-quality imaging from iCam12 on a single, integrated, versatile platform. The ability to simultaneously perform high-resolution fundus and external photography, enables the OCT image to be overlaid with the

fundus photo. This aids in the diagnosis of the patient, by enhancing any suspected abnormalities.

For more information on the iVue80 OCT system, please visit [www.haagstreituk.com/ivue](http://www.haagstreituk.com/ivue), or email [ivue@haag-streit-uk.com](mailto:ivue@haag-streit-uk.com).
