BY [SAMSUNG GLOBAL](#)

Samsung Electronics today revealed the new Galaxy Tab Active3, a ruggedized tablet based on the popular Tab Active2 design to meet the rigor of today's mobile workforce with a sleek, compact design for portability. The Tab Active3 is built for how businesses operate today with increased emphasis on improving employee productivity and safety. The performance and productivity features are perfect for field-based employees and includes capabilities like Touch Sensitivity to help professionals, like first responders, who use gloves<sup>1</sup> for working safely in the most challenging environments and conditions.

"The way the world does business is rapidly changing as we move away from the office and out into the field," said KC Choi, EVP and Head of Global Mobile B2B Team, Mobile Communications Business, Samsung Electronics. "When developing the new Galaxy Tab Active3 we listened to feedback from our customers and partners and focused on creating a product that would make it easier to get things done. Not only is the Galaxy Tab Active3 more durable, but its performance has been upgraded to support the latest applications for maximum productivity."

The Galaxy Tab Active3 is MIL-STD-810H certified to handle some of the world's toughest jobs in the most extreme environments; its enhanced shock absorption is now able to withstand drops of up to 1.5 meters with an inbox protective cover<sup>2</sup> and it is IP68 rated<sup>3</sup> dustproof and water resistant, providing peace of mind when working in unpredictable outdoor environments.

Equipped with the powerful Exynos 9810 processor, 4GB RAM and up to 128GB internal storage, the Tab Active3 has the power to keep up with the digital businesses of today while Wi-Fi 6 with MIMO delivers super-fast Wi-Fi connectivity for greater data transfer speeds.

The long-lasting, replaceable 5050mAh battery<sup>4</sup> also supports fast charging through USB and POGO pins so you can spend less time plugged in and more time on the task at hand. And for businesses that use tablets in a fixed location like a kiosk, Tab Active3 now supports “No Battery Mode” for power without a battery.<sup>5</sup>

The Tab Active3 is a productivity powerhouse, providing a PC-like experience wherever work takes you. Samsung Dex is now available on the Tab Active3, ensuring dual-screen functionality so tasks can be picked up from anywhere, whether in the office, or in the field.

Samsung strives to provide businesses with the best mobile products and solutions possible. As part of this commitment, the Tab Active3 and the rugged XCover Pro smartphone, will support up to three generations of Android OS upgrades. The Tab Active3 is also protected by Samsung Knox, our defense-grade security platform as well as regular Android security updates. Samsung Knox can also be customized by IT administrators to manage the programs and apps used across the business; giving complete control over the mobile fleet and allowing employees to focus on the job at hand.

The Tab Active3 is the latest example of Samsung’s commitment to delivering the best experience for enterprise customers around the world. The company strives to offer innovative solutions to help organizations get down to business with peace of mind, knowing they can count on Samsung to keep them safe.

This commitment is also paving the way for market recognition. Samsung was recently named as a Leader in the IDC MarketScape for Worldwide Rugged Mobile Devices,<sup>10</sup> which states: “Samsung has extensive experience in producing and designing cutting-edge mobile technology as

one of the world's well-recognized mobile device manufacturers and has expanded its enterprise and B2B strengths to meet customer demands in the rugged category. Their rugged device offerings successfully bridge the gap between industrial ultra-rugged devices and consumer-grade devices, making them durable enough to withstand a number of challenging environments while still providing a familiar and approachable end-user experience."

The new Galaxy Tab Active3 will be available in select markets starting today, including but not limited to Europe and Asia, with availability expanding to other regions at a later date.

For more information about Samsung's latest Galaxy devices including specifications, please visit [news.samsung.com/galaxy](https://news.samsung.com/galaxy), [www.samsungmobilepress.com](https://www.samsungmobilepress.com) or subject to change without notice. Specs vary by markets/carriers.

\* All functionality, features, specifications and other product information provided in this document including, but not limited to, the benefits, design, pricing, components, performance, availability, and capabilities of the product are subject to change without notice.

1 Valid for normal thin glove conditions, not for all gloves.

2 When tested on a flat surface. Without its protective casing, the device can withstand a drop of up to 1.2 meters. The Tab Active3 will be sold with a case to withstand drops of up to 1.5 meters. Actual results may vary.

3 Water and dust resistant based on IP68 rating under IEC standard 60529, which tests submersion in freshwater up to 1.5 meters for up to 30 minutes. Resistance may decrease as a result of normal wear. Rinse residue/dry if wet.

4 Typical value tested under third party laboratory condition. Typical value is the estimated average value considering deviation in battery capacity among the battery samples tested under IEC 61960 standard. Rated (minimum) capacity is 4,900mAh. Actual battery life may vary depending on network environment, usage patterns and other factors.

5 The “No Battery Mode” option must be added to Quick Panel via your settings before use. It requires a dedicated power source accessory and once enabled may limit device CPU performance and reduce brightness and maximum volume.

6 A third-party app or solution required to use Push-To-Talk.

7 A third-party app or solution required to use this barcode scanning.

8 A third-party app or solution required to use tablet as a mPOS.
