

[Video] Galaxy Buds Live Challenge, Part 3: Soaring Through the Air with a Trampolinist

PUBLISHED NOV 12, 2020
BY [SAMSUNG GLOBAL](#)

Galaxy Buds Live are Samsung Electronics' latest open-type earbuds with a one-of-a-kind aesthetic, leading audio quality bolstered by AKG's sound expertise and Active Noise Cancellation for a truly immersive earbud experience. What's more, Galaxy Buds Live feature a revolutionary ergonomic, tip-less design that conforms to the shape of your ear for all-day comfort.

But just how effectively does this convention-defying design hold up when used for some of the most dynamic and movement-heavy activities out there? Samsung Newsroom handed over pairs of Galaxy Buds Live to several movement experts - to really put them to the test.

As well as being a recreational activity we can all enjoy, trampolining is a gymnastic sport that is even recognized by the Olympics for its impressively acrobatic nature. Along with simple jumps up and down, trampolining can involve complex combination moves that see athletes twisting, tucking and even somersaulting as they perform.

Given the acrobatic nature of trampolining, Samsung Newsroom picked the activity as the third way to put the Galaxy Buds Live to the test. Take a look at the video below to check out how the Galaxy Buds Live fared in the third installment of the Galaxy Buds Live challenge series.

Stay tuned to Samsung Newsroom for the next installment in the Galaxy Buds Live challenge series.
